

International Journal of Electroactive Materials

www.electroactmater.com

Welcome Letter

Dear fellow researchers,

We would like to welcome you to the International Journal of Electroactive Materials. The journal is an open access journal that features novel papers and reviews on the latest developments in electroactive materials.

By definition, electroactive materials are materials that can produce and gain electric responses through different reactions. The journal is the perfect platform to publish high-quality, peer-reviewed papers on various disciplines such as electrochemical energy storage, renewable energy, electroanalytical chemistry, corrosion, sensors etc.

Now is the right time for scientific papers on electroactive materials to have their autonomy and to be published more prominently for the advancement of science and technology. All interested readers can read, download, and/or print these open access articles at no cost.

It is only appropriate for us to thank and congratulate the editorial team of the journal on this momentous achievement. Everyone has dedicated the utmost effort and commitment to make the journal a reality. In addition, much appreciation goes to our future reviewers for their endless support and counsel.

We look forward to receiving your articles to be published in our very first issue of International Journal of Electroactive Materials.

Our best wishes,

Ahmad Azmin Mohamad
Muhd Zu Azhan Yahya
Ab Malik Marwan Ali
Mohammad Ismail
Mohd Yusri Abd Rahman
Oskar Hasdinor Hassan
Raihan Othman
